

SKILLS

Angular | Typescript | JavaScript | HTML | CSS | Responsive Web Development & UI

RELEVANT EXPERIENCE

Vinnie Furman Art & Design

Artist, Designer and Developer | January 2017 - Current

- Create illustrations, graphics, websites, Wordpress and Squarespace templates for small businesses and individuals, focusing on user-centric design, functionality, and visually compelling branding that captures attention across platforms.
- Develop wire frames, mock ups, and prototypes to effectively communicate concepts to clients.

DILO Company, Inc.

Full Stack .Net Developer | *Robert Half Assignment* | May 2023-July 2023

- Designed UI and implemented front-end functionality integrated with server-side logic and databases for SF6 gas emission tracking application using C#, ASP.Net, MVC, SQL, Razor, HTML, CSS, Bootstrap and JS.
- Consumed web services and RESTful APIs to integrate information from SF6 equipment and client data to track SF6 emissions and keep companies within EPA compliance.
- Collaborated with technical and non-technical stakeholders to ensure application compliance with business needs and EPA regulations.

Progressive Insurance

Business Intelligence / Full Stack Developer | *Precision Systems Assignment* | October 2020-December 2021

- Responsible for implementing new features, designing and maintaining UIs using HTML, CSS, JavaScript, C#, and SQL as well as providing aesthetic and functional design guidance to the team.
- Updated internal business applications for browser compatibility and keyboard accessibility features.
- Established visual standards, templates and approval processes for Tableau and Power BI reports.

Web Application Developer | *Precision Systems Assignment* | September 2019-September 2020

- Worked within a Agile/Scrum team to integrate new forms and UI elements into MVVM quoting application, facilitating improved data collection and A/B testing capabilities. Utilized Angular, NGRX, Typescript, and C# to drive enhancements.
- Identified, reported and fixed website and application errors through unit testing and device testing to ensure the seamless performance and appearance of applications on various devices and browsers.
- Collaborated with design and accessibility teams to create and implement new WCAG accessible UI features for the relaunch of Progressive's homepage.

TY Graphics

Front-End Developer | February 2017-March 2019

- Responsible for building, implementing and fixing front-end code for clients and TY Graphics own internal component library.
- Developed web application using Google APIs to automate quoting processes for vehicle transportation company.
- Developed animation driven web application that allowed non-verbal individuals to communicate via iPad using common web technologies and Web Speech API.
- Worked with video production and design company to create dynamic video and animation driven website to showcase work and attract new clients.

Jo-Ann Stores

Web Production Consultant | *Robert Half Assignment* | January 2012-January 2017

- Used Adobe products to prepare product images, layouts, banner ads, GIF animations and other promotional material to fit production requirements.
- Built and maintained responsive landing pages, e-commerce sale sites and e-blasts in HTML, CSS and JS.
- Created modular component library to streamline design and implementation processes and enable coworkers to edit landing pages and emails with no prior HTML or development knowledge.
- Lead development team in implementing new mobile enhancements and CSS3 updates to existing web assets.

Rosetta

Visual Design Contractor | February 2011-September 2011

- Produced visual design concepts for websites, mobile apps and flash animations. Accounts included HHGregg, Ecolab, The UPS Store, Office Max, and Brown Brothers Harriman.
- Worked with account managers to ensure designs were on-brand and up to client standards.
- Collaborated with UX and Development teams to implement visual designs online.
